

TECNALCO

ALUMINIUM TECHNICAL ENGINEERING FACTORY

Home

TECNALCO – Aluminium Technical Engineering Factory was established in 1981, and has made its name since amongst discerning customers as a supplier of high quality air distribution devices and duct accessories. Located in the northern emirate of Umm Al Quwain, United Arab Emirates, TECNALCO's manufacturing facility is one of the largest and oldest in its field.

Comprising of over two hundred employees, and with more than two decades of experience, we are well equipped to handle all manner of customer requests and queries.

Our product offerings include: grilles & registers, linear bar grilles, square diffusers, slot diffusers, round diffusers, perforated diffusers, air louvers, exhaust valves, door grilles, non return dampers, sand trap louvers, jet diffusers, volume control dampers, fire dampers, sound attenuators, plenum boxes and access doors.

The majority of our products are manufactured from aluminum extruded sections, in polyester/ epoxy powder coated surface finish.

About-Us

Tecnalco 'Aluminium Technical Engineering Company' first commenced operations towards the end of 1981.

In those early days the company, a partnership set up by Mr. Ibrahim Saeed Alghas and Mr. Adul Salam Mohammed Al Zoorooni, two enterprising and hardworking young U.A.E locals from the Emirate of Umm Al Quwain set about the task of fabricating doors, windows, kitchen cabinets and fixed partitions etc, to supply the growing demand arising from construction. Tecnalco was one of the first companies in the U.A.E to manufacture these products and though enjoying some success in this segment, the decision was made in 1984 to switch operations to the fabrication of central A/C grilles, diffusers and door grilles etc.

The product list grew along with the company's expertise to include many new items which were then grouped into the nine chapters of our product catalogue.

Products

FAG D/D: Fresh air grille
double frame with Hinged
type
